F4 ECU Update No. 3

Technical Bulletin # F4-2022-EN003-00

Approval

This Technical Bulletin provides information on an ECU update to be performed prior to the 2022 VIR event.

Overview

HPD will perform the updates on the ECUs during the load-in and test day at VIR. ECUs will be updated in the cars.

Due to a file handling issue, all intended updates are not currently installed. The latest calibration will consolidate all updates from 2022.

Teams are encouraged to bring all ECUs that were flashed with the original 2022 calibration to be updated at the event. ECUs will be updated free of charge. The current GIN file will still be valid.

If you have any questions regarding the content of this bulletin, please contact Andrew Salzano at asalzano@hra.com or GRMS Admin at GRMSAdmin@hra.com.
